Key Business Insights

Critical

Early Tenure Drives Attrition

Employees with 0–2 years tenure attrite at **30.2%** — nearly 4× higher than employees with 10+ years (8.3%).

Critical

Young Employees Most at Risk

Ages 18–25 attrite at **35.9%**, more than double the 26–30 cohort (21.1%).

Critical

HR Needs Immediate Attention

HR attrition is **29.8%** — almost double R&D (15.8%) and Sales (15.1%).

Watch

Experience Impacts Retention

Poor work-life balance (**31.2%**) and low satisfaction (**22.9%**) drive turnover.

Low Impact

Gender: Minimal Influence

Males attrite at **16.8%** vs. 15.4% for females — not a significant driver.

Recommendations & Risk Profile

Business Recommendations

- ✓ Strengthen **onboarding and mentoring** programs during employees' first two years.
- ✓ Improve **work-life balance** through flexible work policies and wellness initiatives.
- ✓ Conduct a focused **retention review within Human Resources**.
- ✓ Increase **engagement** through regular feedback, career development, and recognition programs.

Highest-Risk Profile

Risk factors compound. An employee matching this profile represents the highest probability of attrition — a natural target segment for retention programs.

Age **18–25**

Tenure **0–2 yrs**

Dept **HR**

Work-Life **Bad**

Prioritizing this segment offers the highest-leverage opportunity to reduce overall attrition below 16.2%.
